

# FULL LIFETIME WARRANTY

FOR AS LONG AS YOU OWN AND RESIDE IN YOUR HOME  
ON MILGARD PRODUCTS INSTALLED IN THE UNITED STATES AFTER 12/01/09

Milgard Manufacturing Incorporated ("Milgard") guarantees to the original consumer purchaser ("Original Purchaser") of Milgard windows, doors or skylights (hereafter referred to as "Products") installed in a single family home or a multi-family home unit ("Home") by the builder as new construction or by the Original Purchaser as replacements that Milgard will repair or replace any such Milgard Products\* that are defective in materials or workmanship and will pay the costs of all parts and labor. If repair is not commercially practical or cannot timely be made, then Milgard will, at the Original Purchaser's option, either replace any defective Milgard Products or refund the purchase price.

#### PERSONS COVERED

This Warranty extends to the Original Purchaser of Milgard Products. The Warranty starts on the date of purchase of the Home as new construction or the installation of Milgard windows, doors or skylights in the Home as replacements ("Start Date") and remains effective as long as the Original Purchaser owns and resides in the Home. In addition, if the Original Purchaser sells the home before ten (10) years has elapsed after the Start Date, Milgard will automatically extend full coverage under this Warranty to the new owner(s) of the Home and any subsequent owners, until the tenth (10th) anniversary of the Start Date.

#### EXCLUSIONS FROM COVERAGE

This Warranty does not cover damage or defects relating to misuse, abuse, the use of applied tints or films, alterations including but not limited to customer-applied finishes, normal wear and tear, broken glass\*\*, natural weathering of exterior finishes, acts of nature (e.g. fire, hurricane, etc.), building settling, structural failures of walls or foundations or improper installation, storage, or handling or failure to properly care for and maintain the Milgard Products\*\*\* Normal wear, including discoloration, on hardware component finishes is not a defect and is not covered by this Warranty. Loss of functionality of hardware (except as provided below for stainless steel hardware\*\*\*\*) in highly corrosive environments, which includes any Home located within two miles of salt water and any Home located in the State of Hawaii, is also excluded from coverage. For Milgard Products with argon or krypton gas-filled insulating glass, Milgard injects the gas at the time of manufacture. The gradual dissipation of inert gas may occur naturally over time and is not a defect. Other than gas loss due to seal failure, this warranty does not cover the gradual dissipation of inert gas or the amount of inert gas remaining in the Milgard Products at any time after manufacture. This Warranty does not apply to any Milgard Products that are installed in a Home that has a non-drainable EIFS or DEFS siding product.

Milgard reserves the right to modify or discontinue any of its Products. For the repair or replacement of modified or discontinued Products, Milgard will have the right to substitute current Products and components of equal quality and as similar in appearance as possible. Milgard will not be obligated to replace discontinued Products and components for which no similar alternatives are available.

Milgard WoodClad™ fiberglass windows and doors may, as an option, be purchased with unfinished wood interior surfaces that must be finished prior to, or immediately after installation for maximum protection. Unfinished wood surfaces that experience water damage at the jobsite or are left unfinished after installation and become stained or damaged will not be considered as defective in materials and workmanship under the terms of this Warranty.

#### LIMITATIONS ON REMEDIES

In no event will Milgard be liable for incidental or consequential damages (other than labor to repair or replace Products, screens or stainless steel hardware under this Warranty), whether based on breach of express or implied warranty, breach of contract, negligence, strict liability or any other legal theory. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

#### STATE REMEDIES

This Warranty gives you specific legal rights, and you may have other rights which vary from state to state.

#### CONTACT US

To obtain service under this Warranty, contact us at 1-800-Milgard or access Milgard's website at [www.milgard.com](http://www.milgard.com). Please keep this certificate for your files.

#### \*SCREENS, INTEGRATED BLINDS AND SKYLIGHT COMPONENTS

Milgard will replace any window or door screen frame and mesh that is defective in materials or workmanship at no charge to the Original Purchaser (including parts and labor) for a period of one (1) year after Start Date. Milgard will replace any integrated blind that is defective in materials or workmanship at no charge to the Original Purchaser (including parts and labor) for a period of five (5) years after Start Date. Milgard will replace the electric motor or basic drive unit of Milgard's operable skylights that are defective in materials or workmanship at no charge to the Original Purchaser (including parts and labor) for a period of one (1) year after Start Date.

#### \*\*COVERAGE FOR GLASS BREAKAGE

On Tuscany®, Ultra™ and WoodClad™ product series only, the Full Lifetime Warranty will extend to glass breakage including tempered glass, unless attributable to acts of nature (e.g. fire, hurricane, etc.), civil disorder, building, building settling, structural failures of walls or foundations or improper installation, storage, or handling. Specialty glass (e.g. V-Groove, laminated glass) is not covered by this glass breakage warranty.

#### \*\*\*PROPER CARE AND MAINTENANCE

Please see the Care and Maintenance Instructions on the back side of this certificate or go to Milgard's website at [www.milgard.com](http://www.milgard.com).

#### \*\*\*\*HARDWARE

Milgard will replace at no charge (parts and/or labor) stainless steel hardware that loses functionality in highly corrosive environments within one (1) year after the date of installation of the windows, doors or skylights as new construction or as replacements.

**Your Milgard windows and patio doors will continue to perform well if given some simple, routine Care and Maintenance Instructions. With proper care, your windows and doors will continue to operate at their best and look great. Milgard's Full Lifetime Warranty (see reverse side or access Milgard's website at [www.milgard.com](http://www.milgard.com)) does not cover damage or defects related to a failure to follow the Care and Maintenance Instructions below.**

#### GLASS CARE

Proper care of your window and door glass is important to gain the maximum effectiveness of insulating, low-e or reflective glass. Any of the "Don't" actions listed below can damage the glass surface or destroy the insulating glass seal.

**Don't** use any petroleum-based cleaners or caustic chemicals on your glass.

**Don't** use a razor blade, abrasive pad or putty knife to clean the glass.

**Don't** use a high-pressure spray nozzle when rinsing your glass after washing.

**Do** clean glass with a mild dish soap and water. Rinse completely with clean water and wipe dry with a soft cloth to avoid water spots.

**Avoid** washing glass in direct sunlight for best results.

**Do** clean screens by first removing, then washing on a clean, flat surface with a mild soap and water solution using a soft brush. Rinse, dry and reinstall.

#### MOLD AND CONDENSATION

Water condensation can occur on your window and door interior surfaces if certain conditions exist. Often it's a warning to you that excessive moisture exists in your home that may facilitate mold growth. Condensation on interior window surfaces results from higher moisture content in the air contacting lower temperature surfaces on the glass or frames. The higher your home's interior humidity and the lower the outside air temperature, the more condensation can occur.

**Do** check all window sashes for smooth and regular operation. Increase interior home ventilation and air exchange devices if needed.

**Do** use your exhaust fans, especially when showering.

**Do** consider installing a dehumidifier. Use ceiling fans to improve air circulation.

**Do** open windows and doors when practical to allow interior moisture to escape.

#### SMOOTH OPERATION

**Do** lubricate the moving parts of window and door hardware if not operating smoothly. Use only a spray silicone product to lubricate moving parts, being careful not to apply excessive amounts. Wipe up any drips or spills. In salt-air environments, monthly cleaning and lubrication may be necessary to preserve function (see text of warranty on reverse side for the exclusion of warranty coverage for functionality of hardware in corrosive environments).

**Do** inspect weather stripping on operable windows and doors to be sure it seals evenly when closed.

**Do** make certain that the track area is kept clean. Frequent vacuuming will clear any accumulated dirt and dust.

**Do** adjust sliding door rollers for proper height clearances. Door rollers are adjusted with a screwdriver through access holes in either the end or side of the sliding panel, located near the bottom of the panel.

**Do** adjust rolling screen doors to slide smoothly. Use a screwdriver, in all four corners, to make adjustments.

**Do** check on the sliding door lock strike placement if you adjust the door rollers. Adjustment is made by loosening screw fasteners, moving strike plate and tightening. Re-check for proper lock operation.

#### DRAINAGE SYSTEMS

Windows and doors use a simple drainage system or 'weep' holes designed in the frame itself. These water drainage pathways must be kept clean and clear of any obstructions to operate effectively.

It's normal for water to accumulate in the sill or track area during a period of wind-driven rain. The weep system is designed to allow the water to drain to the outside as water builds up, or outside wind pressure subsides. Clogged weep holes may prevent excess water from draining. Over time standing water can damage your window or door and lead to structural damage from mold, mildew and wood rot if water enters your wall cavities.

Do keep all sill or track surfaces clean of dirt and debris.

Do make sure that exterior weep holes are clear of any debris, stucco, sand or other obstructions.

Do use a small, soft brush (such as an old toothbrush) to clear openings.

Do regularly inspect the exterior perimeter of your window and door frames for any cracks, or cracks in the adjacent siding material that can cause moisture to penetrate. If a crack appears, seal with a good grade of sealant according to the sealant manufacturer's instructions.

#### IMPORTANT DO'S AND DON'TS

- |               |  |
|---------------|--|
| <b>DO:</b>    | Clean the frame surfaces with mild soap and water.           |
| <b>DON'T:</b> | Use razor blades, putty knives or abrasive scrub pads.       |
| <b>DO:</b>    | Use a commercial glass cleaner or mild soap and water.       |
| <b>DON'T:</b> | Use ANY petroleum-based cleaners or solvents.                |
| <b>DO:</b>    | Clean window & door tracks and weep holes.                   |
| <b>DON'T:</b> | Use oil-based lubricants or damage weep hole covers/baffles. |
| <b>DO:</b>    | Regularly check weather stripping and hardware performance.  |
| <b>DON'T:</b> | Add films or attachments to the glass.                       |
| <b>DO:</b>    | Read and understand your 10-Year Commercial Warranty.        |
